Esri's Education Program

Enabling, Encouraging, and Equipping

... future decision makers to think spatially and critically, solve problems, and use geotechnologies effectively to build a resilient world and become the change agents of tomorrow.

- 7,000+ universities globally
- Free licenses for all K-12 (Esri Schools)
- Education, research, and operations

'Field Operations' - Goals for this Session

- Understand the capabilities of the 3 main Esri mobile field data collection tools.
- Be able to determine which tool is best to meet specific instructional and research goals.
- Gain confidence using these tools in the **field!**

Outline

- Introductions
- Why field data and collection?
- Esri's apps
- Field Trip!
- Discussion
- Resources / Wrap-up

Why empower students with field tools?

1. **Collect needed data.**
2. **Connect people with issues in their own community.**
3. **Develop skills in field data collection, citizen science, data assessment, mapping, spatial analysis.**

Can you name this location?

'Field Operations' in the Classroom?

- Making GIS 'relevant'
- Develop workplace skills
- Own the entire GIS 'lifecycle'

How can you map field-gathered data?

6 selected methods:

1. Create a map tour story map with geotagged photos.
2. Add a set of geotagged photos as “[photos with locations](#)” to ArcGIS Online.
3. Conduct field work with GPS receivers, Pasco or other probes, or other devices > create a file with locations > Add to ArcGIS Pro or ArcGIS Online.
4. Create a table with locations and attributes > output to CSV > Add to ArcGIS Online.
5. Use other field apps: eBird, Globe Observer, Mapillary, [iNaturalist](#), fitness apps, or other apps. Export to CSV or other format > Add to ArcGIS Online.
6. Use ArcGIS Survey123, ArcGIS Field Maps, or ArcGIS QuickCapture to collect data that is mappable.

Field Operations & Data Collection

Specialized Data Collection

Survey123

Form-Centric Collection

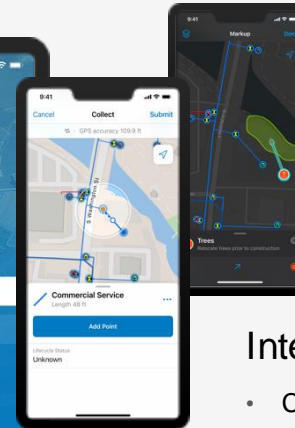

QuickCapture

Fast Observation Collection

Geocentric Data Collection

ArcGIS Field Maps

Integrates

- Collecting
- Updating
- Tracking
- Viewing
- Markup

Comprehensive Field App

Dashboard

Comparing the 3 ArcGIS Field Data Collection Apps

ArcGIS Survey123

- Fill out a form
- Example:
Interviews

ArcGIS Field Maps

- Place info on a map
OR update existing
info
- Example:
Map your school

ArcGIS QuickCapture

- Press a single button
- Example:
Trash locations

Each of the 3 apps do the following:

1. Capture location
2. Create points, lines and polygons
3. Have ability to add photographs.
4. Work online or offline.

Therefore...

Focus on app that best meets your need for field data and your instructional goals.

If it serves your purpose, it is the best app.

A screenshot of the ArcGIS Survey123 design interface. The main content area shows a question titled "What does the litter look like?" with a "Submit a photograph" instruction and a "Drop image here or select image" field. Below this is a "Tick all the types of litter found here" section with a list of options: Glass, Plastic, Paper, Cans, and Bottles, each with a checkbox and a radio button. The right sidebar contains a "Hint" section with a text area, a "Choices" section with a list of the same options and checkboxes, and an "Other" field. The top navigation bar includes "Overview", "Design", "Collaborate", "Analyze", "Data", and "Settings". The user's name "Joseph" is visible in the top right corner.

Comparison of fundamentals

	Survey123	Field Maps	QuickCapture
Intended use	Filling out forms, including ones with complex choices and structures.	Map-focused data collection and updating (editing), including advanced location capturing (such as offsets and snapping).	Rapid, one-button data collection.
Example projects	Interviews (ideally with a question about location). Restaurant inspections and other long, complex forms.	Creating a map of an area, such as a campus or park.	Where trash is found on campus, BioBlitz.
Authoring			
Authoring experience	Simple drag and drop website to create forms or app for more complex authoring.	Create an editable feature layer (templates available), put the layer in a map, and share the map.	Create an editable feature layer (templates available), configure a QuickCapture project, and share the project.
Authoring workflow	<u>Example</u>	<u>Example</u>	<u>Example</u> <u>Example</u>
Data Collection			
Anonymous data collection?	Yes	No (map shared with specific user)	Limited (supported with ArcGIS Hub Premium, else project must be shared with specific user)
Edit (update) existing data	Yes (if form configured for it)	Yes	No
App required for collection	No	Yes	Yes
Capture user-entered information	Yes	Yes	Limited
Capture multiple features simultaneously	No	No	Yes
Capture a line as you walk or drive along it	No	Yes	Yes
Capture into multiple layers in a single form/map/project	No	Yes	Yes
Offline			
Offline support	Yes	Yes	Yes
Offline basemap	Yes Supported for geographic areas you as the map author define.	Yes Supported for geographic areas defined by the map author or defined in the app by the data collector.	Yes Supported by adding a map package (TPK, VTPK, or MMPK) to your project.
Offline workflow	<u>Offline workflow</u>	<u>Overview video and Implementation Guide</u>	<u>Blog on configuring the map</u>
After collection			
Viewing the data	Has integrated analytics and reports.	Use Map Viewer or other apps.	Use Map Viewer or other apps.

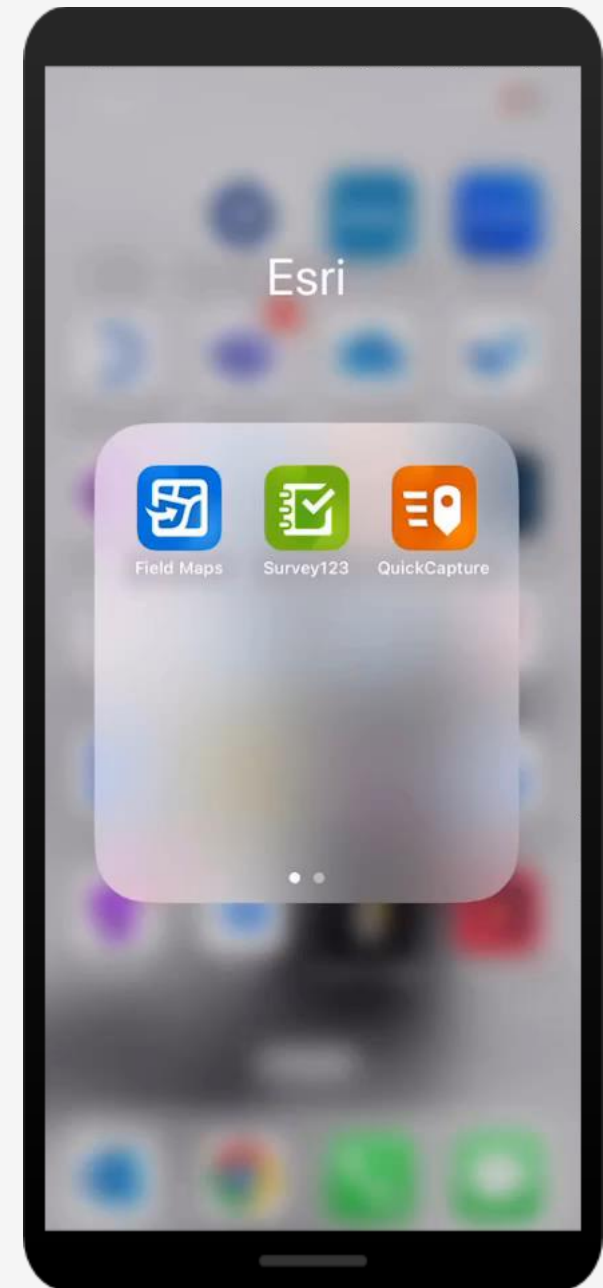

Let's go into the field!

Comments: Nice globe.

Last edited by student.edsummit34 on 4/9/2024, 10:28 PM.

1 of 3

The image shows a screenshot of a software interface. On the left, there is a vertical list of three items, each with a camera icon and the text 'Low priority reported by [Name]'. The main area on the right contains a large photograph of a globe on a desk. In the foreground of the photo, a camera and a lens are visible. Above the photo, there is a timestamp 'Photo captured on 4/9/2024, 10:27 PM' and a comment 'Comments: Nice globe.'. Below the photo, there is a timestamp 'Last edited by student.edsummit34 on 4/9/2024, 10:28 PM.'. At the top right of the main area, there is a navigation indicator '1 of 3' with left and right arrows.

Not only is it important to ask questions and find the answers, as a scientist I feel obligated to communicate with the world what we were learning.
